

Who is covered by the Yingli solar installation manual?

This manual applies to photovoltaic modules ("PV modules", also commonly known as solar panels) manufactured by Yingli Energy Development Company Limited ("Yingli Solar"), and is explicitly written for qualified professionals ("Installer" or "Installers"), including without limitation licensed electricians and RAL Certified PV Installers.

What angle should Yingli solar panels be mounted?

Yingli Solar recommends that PV modules be mounted at a minimum tilt angle of 10 degrees to allow for proper self-cleaning from normal rain showers. Partial or complete shading of a PV module or modules can significantly reduce system performance.

Are Yingli Solar PV modules fire resistant?

Yingli Solar PV Modules have a Class C fire resistance rating in accordance with the IEC 61730-2 certification. When PV modules are mounted on rooftops, the roof must have a fire resistant covering suitable for this application. PV modules are electrical generating devices that may affect the fire safety of a building.

Where should Yingli Solar PV modules be mounted?

Yingli Solar PV modules must be mounted on appropriate installation structures positioned on suitable buildings, the ground, or other structures suitable for PV modules (e.g. carports, building facades or PV trackers). PV modules must not be mounted on moving vehicles of any kind.

Is Yingli Solar liable for infringement of patent rights?

Yingli Solar assumes no responsibility for any infringement of patents or other rights of third parties, which may result from using Yingli Solar PV modules. No license is granted expressly or by implication or under any patent or patent rights.

What size cable should Yingli Solar use?

Yingli Solar recommends installers use only sunlight resistant cables qualified for direct current (DC) wiring in PV systems. The minimum wire size should be 4mm². Cables should be fixed to the installation structure in such a way that mechanical damage of the cable and/or the module is avoided.

Yingli Solar Panel Technologies. Yingli currently have 70 solar panels approved by the Clean Energy Council in Australia under names Yingli Energy (China) Company Limited and Yingli Energy China Co Ltd. This is a ...

YLM 60 CELL 270-290 Yingli Green Energy Holding Co., Ltd. Technologie: Gamme de Puissance: ... They are recommended for on grid systems due to their technical specifications and they are not difficult to get.
