

470 type photovoltaic panels installed on the roof

Can solar panels be installed on a commercial roof?

If you're considering installing a residential or commercial solar panel system, you might wonder if your roof type is appropriate for a solar installation. The good news is that solar panels can be installed on just about any roof type, but the installation process and mounting hardware might vary from material to material.

Can you install solar panels on a flat roof?

Ballast systems are simply a weighted racking setup that holds solar panels in place. If you need to drill into your flat roof to install solar panels, don't worry- your solar installer will ensure that the holes they drill are as small as possible and sealed correctly to avoid roof damage or leaking. Can you install solar panels on wooden roofs?

Which roof is best for solar panels?

No one type of roof is best for solar panels - mounting solutions exist for just about every roof out there. Some roofs will cost more to mount solar panels on. This is due to the different equipment installers need to use. Start comparing customized solar quotes today on the EnergySage Marketplace.

Where should a photovoltaic panel be installed?

Class A, B or C photovoltaic panel systems shall be installed in jurisdictions designated by law as requiring their use or where the edge of the roof is less than 3 feet (914 mm) from a lot line. RS404.1 (R905.1) Roof covering application.

Should I re-shingle my composite roof before installing solar panels?

If your composite roof is older than 15 years or starting to show major signs of wear, solar installers will likely recommend re-shingling before installing solar panels. Even so, composite shingles are often considered the best material on which to install solar panels. Related Reading: [How To Choose Solar Panels for Your Home](#)

Can you install solar panels on a tar & gravel roof?

This is very simple to do, but it will be more expensive than installing on a tilted roof or with a different material. Nevertheless, tar and gravel is still a very viable roof material for the installation of solar panels. The last roof type that you will see commonly throughout neighborhoods are wooden roofs.
