What is the solar power series?

The project is titled The Solar Power Series. Hegen is a German photographer who has focused his career on capturing aerial photos that offer insights into the traces humans are leaving on Earth's surface. Hegen "provides an overview of places where we extract, refine and consume resources," his website reads.

What is a solar thermal power plant?

The neatly-arranged circular facilities seen in Hegen's images are solar thermal power plants, which focus sunlight from thousands of moving mirrors called heliostats onto a central collector tower.

Where are Hegen's solar projects located?

The locations seen in Hegen's project include the Ivanpah Solar Power Facility in California's Mojave Desert, the Crescent Dunes Solar Energy Project in Nevada, the Les M&#233;ses Solar Farm in France, the PS10 Solar Power Plant near Seville in Spain, and the Gemasolar Thermosolar Plant that's also near Seville, Spain.

Why is aerial photography important?

The photographer tells Fortune that he often sees unintentional artistic beauty in the way humans interact with the planet in large-scale ways. " [Aerial photography] shows dimensions and reveals insights we wouldn't be able to see from the ground," the photographer says.

What are photovoltaic modules used for?

Photovoltaic modules are used to convert light directly into electricity. "Aerial photography, to me, is like data visualization for scientists," Hegen says in a 2022 interview with Fortune. "The elevated perspective has such a remarkable ability to show the scale and context of a landscape.
