Can solar panels be installed on a commercial roof?

If you're considering installing a residential or commercial solar panel system, you might wonder if your roof type is appropriate for a solar installation. The good news is that solar panels can be installed on just about any roof type, but the installation process and mounting hardware might vary from material to material.

How do you install solar panels on a roof?

The first step in the physical installation process is securing the roof attachments supporting the solar panels. First, the installer will find the rafters beneath your roof shingles. They'll either use a stud finder or measure from the roof's edge to find the rafters, typically spaced 16-24 inches apart.

How to choose a solar roof?

Solar rooftop panels are installed using solar mounts. Identifying the area for solar panel installation helps determine how many solar mounts you need. Also, while identifying the total rooftop area, you can specify the extent of shade-free area. Ascertain the endurance capacity of the roof, as the solar panels are bound to weigh heavy on it.

What is a roof-mounted solar panel installation?

Roof-mount solar panel installations are less intrusive and invasive, and there is no need for extensive pre- and post-installation work or construction. Roof-mounted solar panels add aesthetic appeal and blend seamlessly with roofs, making them ideal for residential rooftop surfaces.

Can you install solar power on a tiled roof?

QuickMountPV offers up an installation guide - with a very nice series of images - for those installing solar power on top of tiled roofs. In this installation tweet from Sunrun, you can see how to attach to the plywood base layer of a roof.

Do I need planning permission to install solar panels on my roof?

In most cases, no, you do not need to apply for planning permission to install solar panels on your roof. Typically, it's considered permitted development and shouldn't affect neighbors in any meaningful way. After all, you aren't expanding your property. You're just adding to what's already there.
