

Building a solar power station on the hillside

Where can a ground-mounted solar panel be installed?

Ground-mounted solar panels can be installed anywhere with good sun exposure and sufficient amounts of open space - a minimum of 350 square feet is usually required. Ground-mounted solar panels are also known as backyard solar panels, free-standing solar panels, and ground-mount PV systems.

Can solar panels be installed on a hill?

Panels installed on rolling hills follow the contours of the land, but technically remain flat relative to the ground. Schrock has witnessed installers working on 20 and 30° slopes, but with much difficulty. SunModo installed a residential ground-mount solar array into a hillside. SunModo.

Can a solar array be installed on a hill?

No matter where you're at there's going to be some sort of undulation," said Rob Stoll, photovoltaic tracker design manager at RBI Solar. A ground-mounted solar array ascends up a hill. While it's simpler to install solar on flatter terrain, hills and undulating ground are feasible solar sites. RBI Solar

Should I choose a roof or a ground-mounted solar system?

If your roof works for solar and can fit enough solar panels to meet your energy needs, it's usually best to choose rooftop solar panels. If you need a really large system that won't fit on your roof and you have enough open land, opt for ground-mounted panels.

What should I consider when building a DIY solar power station?

One important factor to consider when building this DIY solar power station: Since I've gone with a flooded lead-acid battery, it is extremely important to not drain the capacity past 50%. This is due to something called depth of discharge (D.O.D).

How do you build a pole-mount solar system?

To build a pole-mount solar system, you'll dig a single deep hole in the ground. It'll hold a large pole, upon which you'll connect your rails and mount your solar panels. Pole-mount systems offer greater clearance from the ground, which is useful in avoiding foliage or other ground obstructions.
