

Building houses with solar power

Should you buy a home with solar panels?

A home with solar panels has lower electricity bills than an equivalent home without solar panels. Over the life of the solar system, the savings exceed the higher up-front price of the home. Homebuilders can share information with consumers about financing options and incentives described in the Homeowner's Guide to Going Solar.

Should you add solar panels to your new home?

Adding solar panels to newly constructed homes can increase the sale price, attract new customers, and distinguish a homebuilder and their homes among competitors. A SETO-funded study found that homeowners across the country have been willing to pay a premium for homes with an average-size solar array.

Should you choose solar energy for your home?

Before starting the process of powering your home with solar energy, homeowners should investigate their energy use and consider potential efficiency upgrades. Homeowners should be well aware of their total electricity usage, and consider low-cost and easy-to-implement efficiency measures before choosing solar.

Which solar panels are best for your home?

Monocrystalline solar panels are the most popular. They're the most efficient and have a simple, low-profile design ideal for residential homes. Monocrystalline, or mono, panels are created from pure silicon and come in two different variations: passivated emitter and rear contact (PERC) and bifacial.

Can a home builder help you go solar?

Homebuilders can share information with consumers about financing options and incentives described in the Homeowner's Guide to Going Solar. Finally, solar owners are eligible for financial incentives under the Inflation Reduction Act of 2022 (see below), which reduce the cost of going solar.

Should I add a solar energy system to my roof?

You may be considering the option of adding a solar energy system to your home's roof or finding another way to harness the sun's energy. While there's no one-size-fits-all solar solution, here are some resources that can help you figure out what's best for you. Consider these questions before you go solar. See the Spanish version [here](#).
