

Buy a solar panel and generate your own electricity

Can you install solar panels on your own?

It's possible to install solar panels on your own, but DIY solar installation requires serious know-how and tools. Some solar companies design solar panel kits targeted toward DIYers. However, these kits are often meant for small builds, such as converting a shed, RV, or boat. Installing a solar energy system requires knowledge of electrician work.

How do I get solar power?

Here are the steps to take to get powered by sunshine. Choose a solar installer. An installer can help you determine whether your roof is suitable for solar panels. Begin by researching qualified, insured installers online or asking for recommendations from people who've gone solar.

How do I buy a solar system?

For example, you may have just bought new energy-efficient appliances, or you could be planning to buy an electric vehicle that will need charging. Evaluate your finance options. You can buy or lease a PV system. Buyers can either purchase a system outright or obtain a solar loan.

Are DIY solar panels worth it?

One of the primary appeals of DIY solar panels is that you can save money. According to EnergySage, solar panels cost an average of \$29,410 for a 10-kilowatt (kW) system. Roughly half of that cost goes toward labor, overhead, margin, customer acquisition, and other costs that do not apply to a DIY solar power installation.
