

Can be used as a seat or a locker

What percentage of lockers should be accessible?

If lockers are provided, at least 5 percent, but not less than one of each type (full, half, quarter, etc.) must be accessible. Accessible benches should be located adjacent to the accessible lockers. Accessible benches are required in dressing, fitting, and locker rooms, and where seating is provided in saunas and steam rooms.

How big should a locker room be?

In an open facility like a locker room there must be a minimum clear floor space of 30 inches by 48 inches that allows for either forward or parallel approach of lockers by a person using a wheelchair. An accessible dressing room with a sliding or swing door requires a 180 degree turning circle inside.

Are locker rooms ADAAG compliant?

When provided, dressing, fitting, or locker rooms must be accessible and comply with all ADAAG provisions. If they are in a cluster, 5 percent, or at least one must be accessible. There must be an accessible route through the door and to all elements required to be accessible in the room.

Are your lockers ADA compliant?

Based on the 2010 ADA Standards for Accessible Design the space must comply with the regulation in section 803 Dressing, fitting and Locker Rooms and section 811 storage. Let's start with section 803 and we will review all sub sections to ensure our lockers are ADA compliant based on the following code sections below.

What is a locker room bench?

Locker rooms are also considered "dressing rooms" if the lockers are used to keep uniforms or clothing like at a gym or a medical building where people will change into clothes for a specific purpose. This bench is located up against the wall in a locker room and therefore has back support.

How high should a locker be above the floor?

Storage spaces such as shelves, hooks, coat rods and lockers should be located at between 15 and 48 inches above the floor. If lockers are provided, five percent must meet ADA specifications. The locking mechanism should be no higher than 48 inches above the floor.
