

Compensation for someone who died after falling while installing photovoltaic panels

Was a worker electrocuted while installing solar panels?

During the solar panel installation, the worker noticed an exposed cable arcing and emitting smoke. PHOTO: BT FILE SINGAPORE - A worker died after being electrocuted while installing solar panels on the rooftop of a building on June 12 with a group of workers.

What happens if you get electrocuted while installing solar panels?

Under the WSH Act, first-time corporate offenders can be fined up to \$500,000, while individuals can be fined up to \$200,000, jailed up to two years, or both. Singapore News - SINGAPORE - A worker died after being electrocuted while installing solar panels on the rooftop of a building on June 12 with a group of workers.

Do solar installers & contractors have a fall prevention plan?

While this case did not involve any falls, solar installers and contractors are reminded to establish and implement a site-specific fall prevention plan to eliminate or mitigate the risk of falling from height," it added. The recent fatalities take the number of workplace deaths to 14 so far in 2023.

Can solar panels fall from height?

"Falls from height are also a risk when installing solar panels. While this case did not involve any falls, solar installers and contractors are reminded to establish and implement a site-specific fall prevention plan to eliminate or mitigate the risk of falling from height," it added. There have been 14 workplace deaths so far in 2023.

Why did a worker die during a cable installation?

During the installation, he noticed an exposed cable arcing and emitting smoke, said the Workplace Safety and Health (WSH) Council in an alert on Wednesday. The worker came into contact with the cable and was electrocuted. He was taken to hospital, where he later died that same day.

Are solar panels safe?

Solar panels generate live current when exposed to sunlight, even when they are not plugged in." It outlined six measures that companies should adopt to protect workers, which included insulating exposed electrical parts, as well as stopping electrical work during bad weather. "Falls from height are also a risk when installing solar panels.

When Does OSHA Require Fall Protection for Solar Installations? This is going to be broken down into two categories: during installation and after installation. OSHA's Construction Code is ...

3. Location of solar panels. While it is important that panels are located where they will receive maximum
