

District Home Solar Power Plant

What is the Fresno DAC community solar farm?

The project was made possible by close collaboration between White Pine Renewables and the City of Fresno. Located in Council District 3, "The Fresno DAC Community Solar Farm is the perfect case study of ensuring equity in the new green economy through public-private partnerships that benefit all Fresno residents.

Where is Fresno's solar power plant located?

The solar power plant is located on an underutilized 76-acre parcel owned by the City of Fresno. City revenues from the parcel are expected to increase due to higher rents from the solar facility's operators.

Which country has the largest solar thermal district heating capacity?

Denmark hosts the largest solar thermal district heating capacity worldwide. However, due to a policy change, the Danish market collapsed in 2020, with only one new solar district plant and three extensions built in 2020, and only one new system commissioned in the country in 2021.

How much heat is consumed in a district heating plant?

Slightly more than 40% of the heat generated globally in district heating plants is consumed by the buildings sector and around another 40% goes to the industry sector, while the remainder is self-consumed on the production sites, used in agriculture or lost during distribution.

Will Denmark provide a third of the district heat supply?

Denmark aims to achieve this target by providing nearly a third of the district heat supply with heat pumps by 2030.
