

Do photovoltaic panels installed on the roof leak

Can solar panels cause a roof to leak?

The installation of solar panels on your roof can be an exciting time as it means you will be cutting down your energy costs considerably, but doing this will involve drilling holes in your roof, which could beg the question of whether this will cause your roof to leak? There are various reasons your roof could leak after installing solar panels.

Is it the solar panels that are leaking?

If solar panels are not ideally suited for your roof, poor installation tactics can make your roof leak. Roofs made from wood shingles, clay, slate, and terracotta tiles are particularly vulnerable to leaks and damage during installation.

How do I fix a roof leak after installing solar panels?

If you're experiencing roof leaks after installing solar panels, contact a professional roofing contractor who specializes in solar panel installations for a thorough inspection. They can identify the source of the leaks and recommend appropriate solutions.

Can solar panels damage a roof?

Fortunately, roof damage from a solar panel installation is extremely rare because installers take precautionary steps while installing panels to prevent leaks and other damage. Like any home improvement project, using the right service provider is essential to a rooftop solar job.

Do solar panels need a roof inspection?

Inspect and reinforce roof flashings and seals to prevent leaks and water damage, especially in areas surrounding the solar panel mounts. Consider a professional roof inspection every few years to assess the impact of the solar panels on the roof's integrity and make necessary adjustments.

Can solar panels be installed on a shingle roof?

Solar panels can be installed on shingle roofs, but some shingle materials may not be as compatible and may require additional consideration during installation. If the roof is not ideal for solar panels, poor installation tactics are more likely to make it leak.
