Check out Super Therm for a storage solution that will reflect up to 95% of radiating heat that's perfect for keeping your shipping container unit cool. Cost - how much paint do I need?

Can you paint a shipping container?

Of course, on top of the type of shipping container paint you use, you'll have options for surface appearance. We recommend enamel paint because it gives off a professional opaque shine. But just like with priming, always invest in enough paint for two coats for optimal paint adhesion. What about colors?

What Paint can I use on a shipping container?

High-quality direct-to-metal (DTM) waterborne epoxy primer. What paint to use on shipping containers? Use a marine-grade direct-to-metal (DTM) waterborne color to paint and maintain your container. The benefits of high-quality, industrial-grade waterborne container paint include: AVOID solvent-based container paint.

How much paint does a 20ft container take?

A 20ft container can take 3 to 4 gallons of DTM waterborne paint, which can get pretty expensive. And for a 40ft or 40 High Cube, the shipping container paint specification calls for double that amount. So you're looking at 6 to 8 gallons for larger container sizes. Not to mention the primer and other supplies you'll need.

Should you paint recycled containers?

Adding paint will reduce corrosion and rust that appears when the bare steel is exposed to the elements, improving the safety and longevity of the container. Painting recycled containers adds a personal touch that could improve home or business visibility. More control over the surface rust level if you invest in sand blasting before painting.
