

How much do energy subsidies cost in the EU?

Total energy subsidies in the EU rose from EUR 177 billion in 2015 to EUR 216 billion in 2021, to reach an estimated EUR 390 billion in 2022. The trend of decline in fossil fuel subsidies continued until 2021, when they were at EUR 56 billion, before increasing rapidly to an estimated EUR 123 billion in 2022 in response to the crisis.

How many energy subsidies are there in the EU-27?

The total amount of energy subsidies in the EU-27 (Figure 1) is estimated at EUR 390 billion in 2022 (+80% compared to the EUR 216 billion in 2021). The economic recovery in 2021 put upward pressure on energy prices and consequently on subsidies. Energy subsidies already rose from EUR 200 billion in 2020 to EUR 216 billion in 2021.

How does the EU support the European solar PV manufacturing sector?

Over the last years, the EU has taken initiatives to strengthen its support to the European solar PV manufacturing sector, which includes several globally competitive companies in several steps of the value chain.

How much subsidies will re-establish a solar industry in 2040?

The cumulative sum of subsidies spent over 15 years to 2040, to re-establish a solar industry with at least 80 GW of annual production capacity, would amount to less than a quarter of the annual agricultural subsidies granted in the European Union today.

Can Europe re-establish a solar industry?

ESIA lays out how its members would like to see the creation of an environment in which there is a realistic chance to re-establish a European PV industry that could grow to a level where it could supply 40% of estimated European solar demand of 100 GW annually by 2030.

Does Europe support battery energy storage?

Policy support for battery energy storage is gaining momentum across Europe as national governments remove regulatory barriers and the EU pledges financial support for this emerging technology.

Solar energy, in particular photovoltaics (PV), is currently the fastest growing renewable energy source in the EU. Last year, 56 GW of solar PV were installed in the EU, two thirds of it on rooftops, empowering consumers ...

Policy changes in Italy are expected to have a significant impact on the European energy storage market, potentially leading to changes in local energy storage installations in 2024. Firstly, the decline in subsidies under the ...

European PV Energy Storage Subsidy

A substantial increase in photovoltaic (PV) installed capacity has expanded the market scope for mandatory distributed storage, while subsidy policies provide a safeguard for ...

A new subsidy scheme for residential solar-plus-storage installs is now live in Bavaria. The state in southern Germany will provide EUR500 (US\$550) for a storage system of at least 3kWh and a ...

The Polish government will raise subsidy levels for rooftop PV and storage systems from December under its Mój Pr?d scheme. The rebate for solar will increase from ...

The Commission has published today a series of recommendations on energy storage, with concrete actions that EU countries can take to ensure its greater deployment. Analysis has shown that storage is key ...
