

Fengjun 5 generator carbon brush replacement

Do generator collector brushes need to be replaced?

Generator collector brush replacements are one of the most frequent generator maintenance activities. GE enhancements allow for safe removal and installation of the collector brushes with the generator online, easing its replacement (no special tools required) and providing greater reliability during power plant operation.

How do I order a carbon brush?

Or choose from more than 800 stock parts. Carbon Brushes sold online are stock brushes ONLY. Any made-to-order brushes can be ordered by requesting a quote or calling (800) 962-4851. A simple design, one wafer, one tamped shunt, one terminal. Multi-wafer brushes are typically seen with 2 or 3 wafers and commonly connected to a single terminal.

What is generator brush maintenance & replacement?

Generator brush maintenance and replacement is key to extending the life and reliability of an industrial carbon collector brush. Learn more from GE Gas Power.

What is the greatest challenge in carbon brushes?

The greatest challenge in carbon brushes is to supply a grade which will offer the best performance for the manner in which the motor or generator is operating. Consideration must be given to the actual running loads, the duty cycle, the voltage, the peripheral speeds and the environment.

Why should you choose GE generator collector brush holder enhancements?

Increase your plant's safety: GE's generator collector brush holder enhancements reduce the chance of contacting live brushes. Expand generator brush life: Benefit from less collector brush wear, a decreased brush exchange time and carbon brush lifespan extension due to improved maintainability and without the need for tools.
