

Fishing boat solar panels

Can you use solar panels on a sailboat?

You can use solar panels for any size boat. For smaller sailboats, the main job of your solar panels would be to keep the battery fully charged for your boat's electricity. For larger boats, they help reduce or eliminate the need to use the engine to provide excess power. The average 30-foot boat would require about 300-350 watts of power.

What are the benefits of solar panels for boats?

Another benefit of solar panels for boats is the noiseless operation. For those going out on the open water to experience nature, running a generator can be a noisy disturbance. By powering your boat with solar, you can enjoy peace and quiet without losing power. A solar power installation consists of two independent systems:

Which solar panel is right for my Boat?
