

Going to other places to install photovoltaic solar panels

Can solar panels be installed on a roof?

The only no-no is facing the panels north. If that's your only option on the roof, you will have to consider alternatives. While the roof is often the go-to place to install solar panels because it sees the most sunlight, your yard can be almost as effective in some cases.

Where can I install solar panels?

Sheds, garages, greenhouses, and carports can all offer suitable locations for solar installations. Solar carports and solar sheds generate zero-emissions electricity and provide shade, so you could even power an electric vehicle with your garage roof solar panels.

Should I choose a roof or a ground-mounted solar system?

If your roof works for solar and can fit enough solar panels to meet your energy needs, it's usually best to choose rooftop solar panels. If you need a really large system that won't fit on your roof and you have enough open land, opt for ground-mounted panels.

Where is the best place for solar panels?

The roof is the best place for solar panels because it receives the most uninterrupted sunlight throughout the day. If your roof doesn't face south, you're not out of luck. Some solutions for roofs without a southern face include: The only no-no is facing the panels north.

Can solar panels be installed in your yard?

While the roof is often the go-to place to install solar panels because it sees the most sunlight, your yard can be almost as effective in some cases. For example, if you don't have a south-facing roof option, panels in your yard can easily be installed to face that direction.

Do you need a bulky rooftop solar installation?

Luckily, you don't have to choose between a bulky rooftop solar installation or nothing at all. Homeowners have several options to make use of the sun's energy, from backyard solar panels to solar pergolas and beyond. Many of the best unique solar panel placement ideas integrate seamlessly into a home's exterior. Ready to dive in?
