Who is TCL photovoltaic technology?

TCL Photovoltaic Technology is a green energy full-lifecycle smart service provider that offers one-stop solutions integrating development, manufacturing, and energy management. Become an innovator and leader of zero-carbon life and smart life. Become an innovative and leading integrated service provider of green energy solutions.

Is TCL a leader in the photovoltaic market in 2022?

The global photovoltaic market continues to improve, with an intensified competition in the silicon wafer industry worldwide, but it is estimated that TCL's installation capacity will reach 225GW in 2022 and its product strength and operational strength will become some key differentiators in the market.

Why did TCL enter the semiconductor photovoltaic industry?

"We entered the semiconductor photovoltaic sector as we want to produce cleaner and greener energy to help improve the planet." TCL first released proprietary G12 monocrystalline silicon wafers, which have higher photoelectric conversion efficiency and effectively reduce the cost of the entire industry chain.

What is TCL's goal?

TCL's goal is to become a leading brand in the global DG market, and to become one of the best component manufacturers for reducing LCOE in the global Utility Power Plant market.
