How much does it cost to run a gas generator?

Compared to propane and diesel, the cost to run a gasoline generator per kWh is quite high; \$0.73/kWh, to be exact. Natural gas is a little bit different because we don't measure the quantity of natural gas in gallons; we measure it in 1000s of cubic feet (or MCF). For natural gas, we know that 1 MCF contains 1,000,039 BTU of heat content.

How much does a portable generator cost?

A small 7 kW portable generator costs \$10 to \$70 per day to run, while a larger 15 to 20 kW whole-home generator costs \$30 to \$170 per day to run all day. Costs depend on the generator's size, fuel type, and local gasoline, propane, diesel, or natural gas prices. *Costs depend on current and local fuel prices.

How much does a generator installation cost?

Every home is different, and so is every installation. The placement of the generator, the amount of materials required, and the installation of the natural gas or LP fuel source all make estimating installation costs unique. A simple installation might cost about \$2,000, but it can be more than that depending upon your specific situation.
