

How to assemble the A-type bracket of solar street light

How to install solar panels & brackets?

Assembly of solar panels and brackets: Align the installation holes of the solar panels and brackets and tighten the screws. Pre-assembly of batteries: Place the batteries in the battery box, install the sealing ring, and thread the battery wires from the top cover wire outlet. Cover the top cover, align it with the holes, and tighten the screws.

How to install a solar street light?

The location should be in a sunny spot with enough space to accommodate your solar street light without it being in the way of people passing by or restricting access. After identifying a suitable area, secure the mounting bracket to the pole using a drill and screws.

How do you mount a solar light fixture?

Make sure that the mounting bracket is secure enough to hold the weight of the lamp head, solar panel, and other components. Once the mounting bracket is secured in place, attach the solar panel, LED light fixture or lamp head as well as any other components to the mounting bracket. You can use nuts and bolts or screws for this purpose.

How do you charge a solar Streetlight?

Some solar streetlight models require an initial battery charge before the light will operate. Refer to the manufacturer's instructions for charging procedures. It may involve connecting the battery to an external charger. Locate the light switch and turn it on. Observe the light operation for a few minutes.

How to install a solar panel & LED light fixture?

Once the mounting bracket is secured in place, attach the solar panel, LED light fixture or lamp head as well as any other components to the mounting bracket. You can use nuts and bolts or screws for this purpose. Finally, connect the components to the electrical source.
