How do I put panels on a roof?

Click and drag the map in order to centre the building you're working on. Whatever is inside the dotted rectangle is the image that will show on your proposal. Click and drag (holding the left mouse button) to lay down panels onto the roof. While you're still holding the mouse button, you can add/subtract panels and adjust the azimuth.

How much space does a photovoltaic system need?

Photovoltaic modules installed on the ground or on a flat surface occupy an area of approximately 20 m<sup>2</sup>/kWp, avoiding shading between the rows of modules. The design of a photovoltaic system, from the public operator's network to the photovoltaic modules, requires careful planning and compliance with local regulations.
