

# How to hang photovoltaic panels on the colored steel tile roof

Can solar panels be installed on tile roofs?

Ensure that your roof integrity is preserved by taking an active role in your upcoming solar installation. While installing solar panels on tile roofs is certainly possible, it requires the right technique and knowledge. See how SunPower can protect your roof's integrity while providing the world's best solar.

Are metal roofs better than solar panels?

Metal roofs are durable and can outlive your solar panels. Solar panels can increase the cooling benefits of a metal roof. Metal roofs and solar panels are great choices for climate-conscious homeowners. Typically, your solar installer will drill holes in your roof so that they can attach the mounting for your solar panels.

Can solar be installed on a metal roof?

Most homeowners with solar in the United States install standard silicon solar panels, but homes with metal roofs have another option: thin-film solar. Thin-film solar can only be installed on certain types of roofs, and standing seam metal roofs are ideal surfaces for it.

Are thin-film solar panels a good fit for a metal roof?

The solar industry is always cooking up something new, like thin-film panels that could be a perfect match for your metal roof. These innovations are making solar more adaptable and efficient than ever. Pairing solar panels with your metal roof is a smart move, environmentally and financially.

Can you install solar panels on an aging asphalt roof?

You definitely don't want to install solar panels on an aging asphalt roof, which could cost you down the line: If you need to replace your roof before your solar panels, you'll waste money removing and re-installing your panels. Metal roofs, on the other hand, are the most durable conventional roofing material available.

How do solar panels work on a composite shingle roof?

Transitions are reinforced with sheet metal called flashing and sealed to ensure the roof is completely waterproof. Next, a solar expert installs the solar array on the composite shingle surface.
