

# How to install photovoltaic bracket purlin

What is solar panel support with Z profiles and purlins brackets?

Solar power systems use the sun's rays as a high-temperature energy sources to produce electricity in a thermodynamic cycle. Thereby we have to introduce some solar panel support with Z profiles and purlins brackets, which are hot galvanized steel material for use in long time with better surface and the best cost during the system construction.

How do you install a photovoltaic system on a roof?

When mounting on corrugated and sandwich roofs, you fix the photovoltaic installation directly to the purlins of the roof construction. For wooden purlins, you need the stock screw set for wood and for steel purlins the stock screw set for steel.

What is the bolt strength of a roof purlin?

The bolt strength grade (4.6 or 8.8) should be specified by the design engineer to conform with the Stramit®; Purlins, Girts & Bridging - Product Technical Manual. Loads to be suspended from roof purlins must be accounted for in design. No allowance is included in the capacity tables.

How should a purlin flange be connected?

Any such loadings must be connected to the purlin web by using hangers or other means. Never attach loads to the purlin lips. Attachments to the purlin flange must be within 25mm of the web. Connection design should follow the rules within AS/NZS 4600, including a check on bearing of the purlin. Loads should not be suspended from wall girts.

What are the hanger bolts for purlin/rafter installation?

The Hanger Bolts for wood purlin/rafter installation are ER-HB-8/150 and ER-HB-10/200A. The Hanger Bolt for metal purlin/rafter is ER-HB-MP/8/150EP.

What bolts do I need for a purlin?

Normally M12 bolts are required for purlins between 100 and 250, whilst M16 bolts are needed for 300 and 350 purlins. Each bolt requires integral washers. The bolt strength grade (4.6 or 8.8) should be specified by the design engineer to conform with the Stramit®; Purlins, Girts & Bridging - Product Technical Manual.
