

# How to install photovoltaic panel lights

How do I install solar powered lights?

If you're putting DIY solar powered lights in a vehicle or insulated building, I'd recommend using a solar cable entry gland. Locate the solar terminals on your charge controller. They are usually labeled with a solar panel icon or the letters "PV".

How do I install a solar-panel security light?

Follow our easy steps to install a solar-panel security light. A typical solar light kit includes an installation manual, the light fixture with power cord, a solar panel with power cord and fastening hardware. Use a compass or compass app to determine where to install the solar panel.

How to install solar light fixtures?

Clear any debris or obstacles that may hinder the installation process. Ensure that the ground is level and stable to provide a solid foundation for the light fixtures. Taking the time to prepare the area will ensure a smooth and secure installation. Now comes the exciting part--installing the solar light fixtures.

How do I connect a solar panel to a battery?

Connect the solar panel to the solar charge controller. The charge controller should indicate that the panel has been properly connected. At this point, you can program your charge controller for the battery you're using. I'm using a sealed lead acid battery, so I chose that option.

How do I choose a solar light installation site?

Ensure your solar light installation site is free of obstructions from access to the sun. Also, you'll want to ensure there aren't foreign light sources that can interfere with the panel's light sensor. Keep the pole away from heat sources and ensure it's on level, solid ground (we can accommodate if the soil isn't the most sturdy).

How do you install solar panels in a shed?

Mount the components to the wall, and build or buy a simple shelf for the battery to sit. Wire the shed with lights and receptacles (if adding). Install the solar panels on the roof or in the yard. Drill a hole and add a waterproof connector called an entry panel, which protects the cables between the solar panel and the power center.
