Are solar shades for Windows a good idea?

Solar Shades for windows offer several unique benefits, including: Solar Shades block up to 99% of UV rays, which can be harmful and are responsible for bleaching your furnishings, causing glare and heat buildup. Solar Shades reduce glare by filtering the natural light entering your home.

How do you make a solar window screen?

Aluminum frame- you will need a spline (rubber cord) and a spline roller. Step 1 - Cut the solar window screen slightly larger than the window frame. Step 2 - Pull the solar screen fabric tightly across the frame. Step 3 - Staple the screen to the frame. Step 4 - Use wood trim molding to cover the frame and ragged edges of the screen fabric.

How much do solar shades cost?

The price of solar shades depends on the size of the window. For example, if your apartment has four average-sized (2m²) windows, it would cost somewhere around \$3,700 to cover all windows. On the other hand, the average household would need a 4kW solar panel system.
