Should I choose a roof or a ground-mounted solar system?

If your roof works for solar and can fit enough solar panels to meet your energy needs, it's usually best to choose rooftop solar panels. If you need a really large system that won't fit on your roof and you have enough open land, opt for ground-mounted panels.

Should you install solar panels on the ground?

Do ground mount solar panels work?

Ground mount solar installation might work better if you have a ground space in your backyard with fewer obstructions than your roof. Ground solar panels will allow you to unlock the full potential of your solar panel system and keep power losses to a minimum.

Do rooftop solar panels take up a lot of space?

While rooftop panels don't take up any space that's regularly used otherwise, ground-mounted solar systems might consume coveted backyard space. Typically ground mounting is going to cost a bit more, but it really is a case-by-case evaluation process.
