Is installing solar panels illegal in any state?

Technically, no state outlaws or bans solar panels; quite the opposite. Most states have solar access laws that forbid any agreement, covenant, condition, bylaw, or contract that outlaws or limits solar installations by Homeowners Associations (HOA) or other municipal bodies.

Do I need planning permission to install solar panels on my roof?

If you want to install solar panels on your roof, you need to follow building regulations. Keep in mind that regardless of whether your solar panel installation needs planning permission, solar panel installations will nonetheless need to pass building regulations, just like many other home improvements.

Do you need a permit to install solar panels?

Generally, local governments require a homeowner's solar installer/contractor to obtain a permit for rooftop panels before they can be installed. After the PV system is installed, a professional from the local government will inspect the new array to ensure all building, electrical, and safety codes have been followed.

Are solar access laws illegal?

With that being said, unpermitted systems are illegal to operate in many American jurisdictions, even in states with solar access laws. What is the difference between solar access laws and solar easement laws?

Are solar panels a viable option?

However, some states still make installing solar panels functionally impossible by creating laws with "reasonable restrictions," such as increased taxing, energy caps, or even billing solar panel users. Combine these laws with a lack of incentive programs, and solar panels are not viable for homeowners in many states.

Can I install a solar energy collection device on my property?

Taking several forms since the policy was originally enacted in 2008, Virginia Law § 55.1-1820.1 states that "no association shall prohibit an owner from installing a solar energy collection device on that owner's property unless the recorded declaration for the association establishes such a prohibition."
