How to choose a solar panel mounting bracket?

Depending on the structure, there are different rooftop solar panel mounting brackets to select from. Besides roof structure, other considerations include: The incline necessitates specially engineered solar panel roof mounting brackets.

Why should you install a solar panel bracket?

The purpose of installing the bracket is to better fix the solar panel. If there is a more convenient and feasible method to fix the solar panel. PVMars will definitely recommend it to you, and effective solutions are based on solar panels' characteristics and your on-site installation environment.

What is JinkoSolar photovoltaic (PV) installation manual?

Thanks for choosing JinKoSolar photovoltaic (PV) modules (hereafter referred to as "modules"). This manual provides important safety guidelines for the installation, maintenance, and use of the modules. To ensure correct installation and stable power output, it is necessary to read and understand all installation instructions before proceeding.

What is the design phase of a Solar Roof mounting system?

The design phase of a solar roof mounting system is where technical expertise truly shines. It involves: Site Assessment: A thorough analysis of the installation site is critical. This includes evaluating the roof's condition, orientation, and any potential shading from nearby structures or vegetation.

What are the installation requirements for Jinko Solar?

Thermal expansion and contraction effects occur on the modules. During installation, the distance between two adjacent modules must be $\geq 10\text{mm}$. If there are special requirements, please confirm with JinKoSolar before installation. 60N. Do not dispose of electrical appliances as unsorted municipal waste, use separate collection facilities.

How to wire a Jinko Solar module?

JinkoSolar recommends the following wiring methods (see Table 9). - When wiring modules, always keep in mind the minimum bend radius (see Figure 7). This minimum bend radius is the permissible curvature the cable can be bent around. Depending on the type of cable, a specific coefficient (Cable multiplier), must be applied.
