

# Latest auction price of photovoltaic panels today

What is a solar module price assessment?

The price assessments reflect solar modules with an output of 570-720W, TOPcon specification and wafer sizes of 182-210. Prices will be expressed in US cents per watt. In addition, the Platts Global Solar Module Marker is a daily average of the six individual solar module panel assessments, providing a global perspective of solar panel prices.

What happened to Photovoltaic prices in October 2024?

Overview by technology of different price points in October 2024, including the changes over the previous month: Only tax-free prices for photovoltaic modules are shown. The prices stated reflect the average offer prices in retail and on the European spot market (customs cleared).

Why are solar module prices so volatile?

Alongside growing demand, since the start of 2023, S&P Global said a combination of importation duties, oversupply and supply chain costs have led to significant solar module pricing volatility. The tool will track six different module spot prices, covering differing geographies, megawattage and time periods.

Does surplus solar offer inventory pricing?

Inventory pricing is not listed and will be provided by request. At Surplus Solar Products Inc. we purchase both new and used surplus solar energy material then match that material with you. Our stock is constantly changing, but frequently includes solar electric panels in a broad range of wattages, frame sizes and colors.

Are competitive auctions the new normal for renewables?

IEA. Licence: CC BY 4.0 Have the prices from competitive auctions become the "new normal" prices for renewables? Prices are nominal; higher values for onshore wind in 2017-18 result from the United Kingdom's contracts for difference (CfD) auction, and in 2021 are associated with a delayed project from the Jordanian auction held in 2014.

Why are solar modules so expensive?

Solar modules have become one of the most sought-after commodities in the increasingly competitive energy markets." Alongside growing demand, since the start of 2023, S&P Global said a combination of importation duties, oversupply and supply chain costs have led to significant solar module pricing volatility.

Recent volatility in PV module pricing has prompted Platts, part of global market data and benchmarking provider S&P Global Commodities, to launch a new daily spot market price assessment for...

At Surplus Solar Products Inc. we purchase both new and used surplus solar energy material then match that material with you. Our stock is constantly changing, but frequently includes solar ...
