

New energy photovoltaic panels installed

Should you install solar panels on your home?

Installing solar panels on your home can significantly lower your electricity bills over time and help you live more sustainably. It's one of the best decisions homeowners can make both for the environment and their property value. Professional solar installation companies typically install solar panels.

Should I add a solar energy system to my roof?

You may be considering the option of adding a solar energy system to your home's roof or finding another way to harness the sun's energy. While there's no one-size-fits-all solar solution, here are some resources that can help you figure out what's best for you. Consider these questions before you go solar. See the Spanish version [here](#).

Should I install solar panels on my roof?

Solar installation is complex, and you don't want to jeopardize such a costly investment. Take the time to properly think through and set up your project before beginning. First, check that your property is suitable for a solar power system. Your roof needs to have enough surface area for the panels required to supply your energy needs.

Does California require new construction homes to install solar panels?

There is a mandate in California requiring new construction single-family homes and multiple-family homes up to three stories high to install solar panels. This mandate took effect in 2020 and applies to new homes in Los Angeles.

How smart solar panel technology is transforming the solar panel industry?

The increasing integration of smart solar panel technologies, including sensors and Internet of Things capabilities, is revolutionizing the solar panel industry. This integration enables superior monitoring, maintenance, and optimization of solar panel performance, leading to enhanced efficiency and effectiveness.

How do I choose a solar installer?

Choose a solar installer. An installer can help you determine whether your roof is suitable for solar panels. Begin by researching qualified, insured installers online or asking for recommendations from people who've gone solar. Comparison-shop by asking multiple installers to come assess your roof.
