What are the different types of solar panel mounting components?

Types of Mounting Components (Hardware) Mounting Brackets are the primary components that attach the solar panels to the mounting surface. They come in various types depending on the mounting surface (roof, ground, pole, etc.). Rails: Rails are long, horizontal structures attached to the solar panels using clamps.

What is solar mount technology?

This part delves into the importance of these factors and how the proper mounting hardware can optimize them. This segment compares tracking systems and fixed mounts, examining their advantages and efficiencies in different environments and applications. Solar mount technology aims to improve the performance of solar panels.
