What are the best outdoor solar lights?

For an affordable lighting option that adds ambiance to your outdoor space, we recommend the 33-foot-long Brightown Outdoor Solar string lights. Available in seven colors (we tested white), these fairy lights survived all of our durability tests and were easy to install, with only two stakes needed for the solar panels.

What are the different types of outdoor solar lights?

Outdoor solar lights fall into three general types based on their light output: motion-activated, dusk-to-dawn, and timer-controlled. Because of solar cell size and battery capacity, the gathered solar energy is a limited resource, so consider when you want the lights to shine and for how long.

Are solar-powered outdoor lights waterproof?

Almost all solar-powered outdoor lights are LEDs, with either integrated or replaceable bulbs. Because they are designed for outdoor use, most solar-powered lights offer decent water and weather resistance. The level of resistance varies from light to light; pay close attention to each model's weather resistance rating.

Are solar lights a good option for outdoor space?

One great way to illuminate your outdoor space is with solar lights. "Solar lights, compared to low voltage and line voltage outdoor lights, are safer and more DIY-friendly since there's little to no wiring required at all," says Sarah Jameson, marketing director of Green Building Elements.

Which solar light is best for a post pick?

Timer-controlled solar lights give you the most control since you can specify the time they turn on and for how long. Dusk-to-dawn solar lights, like our best for post pick, the Kemeco LED Cast Aluminum Solar Post Light, use sensors to automatically illuminate when daylight dwindles and should have the lights remain on until sunrise.
