

Payback period for solar power generation equipment

What is the average solar payback period for EnergySage customers?

The average solar payback period for EnergySage customers is under eight years. Here's what you need to know about how long it's likely to take you to break even on your solar energy investment. Your solar payback period is the time it takes to break even on your initial solar investment.

How long does it take for solar panels to pay back?

The amount of time it takes for the energy savings to exceed the cost of installing solar panels is known as the payback period or break-even period. A typical payback period for residential solar is 7-10 years, although it varies depending on your utility rates, incentives, system size, and other factors.

What is solar payback?

The solar payback calculation is a simplified way to measure the return on investment (ROI) of switching part (or all) of your household's electricity consumption to a renewable energy generation source instead of on-grid power. Simply put, the solar payback period is the time before you break even and start making money on your solar investment.

How do you calculate the payback period of a solar system?

The simplest way to model the payback period is to divide the project's costs by its expected annual production number. That's a good start, but it doesn't tell the whole story. Let's get down to brass tacks: Exactly how long will it take your solar system to pay for itself?

What factors determine the payback period of solar panels?

One of the biggest factors in determining the payback period of solar panels is your grid electricity price. The higher the price, the shorter your payback period. As of July 2023, the national average price for grid electricity was 16.9 cents per kWh.

What happens if I reach my solar payback period?

Your savings can go towards paying off your system, and once you reach your payback period, those savings will go straight into your pocket for the full lifetime of the system! What factors impact your solar payback period?
