What is a solar panel layout drawing?

Here's a rundown of many of the terms you may encounter. Also known as a solar array layout or solar PV layout, a solar panel layout drawing is a key component of a solar plan set. It provides a visual representation of how the panels will be arranged and installed on a specific site.

Who do you serve with solar panel layout drawings?

We serve solar installers and contractors by providing them with solar panel layout drawings. We prepare permit drawings for rooftop solar panel installation companies and commercial Solar Developers.

How do I design a photovoltaic and solar hot water system?

Provide an architectural drawing and riser diagram for the homeowner showing the planned location for future photovoltaic and solar hot water system components. Space requirements and layout for photovoltaic and solar water heating system components should be taken into account early in the design process.

Do you provide installation layouts for roof-mounted solar panels?

We provide installation layouts for roof-mounted solar panels and possess extensive experience in such projects from certified panel installers. Our dedicated solar panel detailing team has the capabilities for creating preliminary, permit and installation drawings for residential as well as commercial buildings.

Should a general contractor install a solar PV system?

A general contractor may face a choice between using an electrical subcontractor or a solar subcontractor to install the PV system. A good solar contractor will have the expertise in solar PV systems plus qualified electricians on staff.

What are as-built rooftop solar drawings?

As-built Rooftop Solar Drawings provide a record of how the system was actually installed. To produce the as-built drawings we require either the hand sketch of the changes made during the installations or photographs so that we can amend the original Rooftop Solar Drawings.
