

Horad is a specialist in solar panel manufacturing equipment. Our company is committed to providing efficient turnkey lines and a range of individual equipment for customers from around ...

Vertical Sorting Machine A vertical sorting machine is an automatic module sorter for sorting and sequencing of PV modules. The sorting machine supports flat and vertical sorting according to customer needs or panel powers. Discover more; ...

One of the most critical machines in the Solar/PV production line is Stringer attaches and solders ribbons on the photovoltaic cells IBC, MBB, and various busbars, ensuring that the cells are ...

Their advantages are as follows: Higher energy-efficiency The lamination cost mainly depends on electricity consumption. Reducing the electricity consumption comes as the best choice to reduce the cost. Compared with other electrical ...

An HiPot tester is an efficient and reliable insulation/withstand voltage tester which can test all kinds and sizes of PV modules. The tester features strong power resistance up to 5kVAC@40mA or 6kVDC@20mA, and can detect 0.01 ...

Auto Trimming Machine The trimming machine can adapt to different sizes and shapes of panels and has a series of merits like high trimming quality, precision and speed, low noise and easy ...

An automatic trimming machine is used to automatically remove burrs and exceed materials from PV module edges after lamination. The trimming machine can adapt to different sizes and shapes of panels and has a series of merits ...

Robot String Layup A robot string layup adopts leading machine vision technology and intelligent algorithms to rapidly and accurately identify the solar panel's size and other information. Discover more; **Auto String Taping Machine** The string ...

Vertical Sorting Machine A vertical sorting machine is an automatic module sorter for sorting and sequencing of PV modules. The sorting machine supports flat and vertical sorting according to ...

A trimming machine is used to trim, or cut, the excess material from the cell edge of the solar module while maintaining uniformity. This is the next step after a solar module has been laminated. Trimming removes excess ...

Photovoltaic panel edge trimming machine exploded

Aesthetic Arrays, Sleeker All Around. IronRidge Contour™ Trim elevates the look of any solar array by providing a sleek trim (or skirt) across the south edge or around the perimeter to hide components that are visible beneath the solar ...

Photovoltaic panel edge trimming machine exploded
