

Photovoltaic panel installation company quotation

Are solar panels a scam?

Beware of extremely low solar prices. You want to be cautious of installers selling solar panels for under \$2.60 per watt, as you may run the risk of getting a low-quality installation or sub-par customer service. Extremely low solar prices can be a sign of a solar scam.

Should I hire a reputable solar installer?

In either case, it's best to hire a reputable solar installer in your area, as a representative should handle all of the necessary permitting for you and will include the cost of the permits in your initial solar estimate. From average costs to expert advice, get all the answers you need to get your job done.

How long does a solar panel installation take?

Compare quotes and sign a contract with a solar installer. Your installer conducts a site visit, either at your house or virtually. Your installer fills out and submits any required permits and documents and orders your equipment. Your solar panel installation takes place over one to three days (on average).

Do I need a license to install solar panels?

Most areas require you to pay for a permit and inspection, and some states require you to have a solar contractor license to install panels. Improper installation can void your system's warranty. Instead, we recommend hiring a local solar panel installation company to correctly install your system for maximum safety and efficiency.

Are solar panels a good investment?

If you don't have the upfront cash, you can take out a personal loan, home equity line of credit or use a solar loan offered by your solar company. Because you have to pay interest and additional fees, solar panels purchased with loans have lower lifetime savings but are still a worthwhile investment.

Do you need a roof to install solar panels?

If your roof is older or in need of repairs, you may need to get it replaced or maintained before it can handle the installation of solar panels. The Department of Energy states that roofs with a slope between 15 and 40 degrees will allow a solar panel system to achieve peak efficiency. Where are you located?
