As a full-service engineering firm, our in-depth knowledge of solar engineering and photovoltaic design enables us to provide the most comprehensive services to our clients ranging from conceptual design and feasibility studies through full engineering and construction.

Can I install solar panels myself?

You can install solar panels yourself, but doing it alone involves risks. Going solar has significant financial benefits: it reduces your monthly electricity costs and can even increase the value of your home. Incentives can lower your overall cost drastically, but solar is still a big investment.

Who is the best solar installation company?

We picked Tesla Solar as the best solar installation company for availability, with a score of 4.6 out of five stars. The company was established in 2009 and has its products ready for installation at third-party solar companies across the country. Mobile App? Free Energy Consultation? Our pick for best customer satisfaction is Blue Raven Solar.

Should I install solar panels on my roof?

Solar installation is complex, and you don't want to jeopardize such a costly investment. Take the time to properly think through and set up your project before beginning. First, check that your property is suitable for a solar power system. Your roof needs to have enough surface area for the panels required to supply your energy needs.
