

Photovoltaic panel installer

How to choose a solar panel installation site?

Prioritize ease of maintenance when selecting your solar panel installation site. The panels should be accessible for regular cleaning, as dust, bird droppings, snow can accumulate and reduce their effectiveness. -- Remi Akinwonmi, solar expert and clean energy advocate, Advisory Board Member Wondering how to install solar panels?

Should you install solar panels on your home?

Installing solar panels on your home can significantly lower your electricity bills over time and help you live more sustainably. It's one of the best decisions homeowners can make both for the environment and their property value. Professional solar installation companies typically install solar panels.

Should I install solar panels on my roof?

Solar installation is complex, and you don't want to jeopardize such a costly investment. Take the time to properly think through and set up your project before beginning. First, check that your property is suitable for a solar power system. Your roof needs to have enough surface area for the panels required to supply your energy needs.

Does Home Depot install solar panels?

Every year, The Home Depot helps thousands of homeowners install solar power systems that will reduce the cost of their monthly electricity bills. Transitioning to solar power requires custom designers and experienced contractors who can work with you on the installation of your solar panels from start to finish.

How do I get a solar installation?

Fill out the online form, and a trusted independent installer will call you to schedule a consultation. The solar specialist will review suggestions for your home based on square footage, power needs and appliance wattage to ensure a whole house solution. When your assessment is complete, we'll follow up with a quote.

How do I prepare for my solar installation?

Clear your driveway and the area around your electrical equipment prior to your installation date. This may include removing or trimming back trees or bushes to provide our crew safe access when on site. Ensure no other contractors or workers will be on site during your solar installation.
