

What are solar panel mounts & racks?

Solar panel mounts and racks are equipment that secures solar panels in place. Mounting allows the panels to be adjusted for optimal tilt, which can be based on latitude, seasons, or even time of day -- to ensure maximum solar energy production.

What is a solar mounting system?

Modern solar mounting systems consist of roof attachments (with or without flashing), mounting rails, and module clamps. These products are designed to allow workers to quickly and effectively install solar panels that will last for decades on the roof, with minimal effect on the roofing materials and no roof leaks.

Where should solar panels be mounted?

Mounting allows the panels to be adjusted for optimal tilt, which can be based on latitude, seasons, or even time of day -- to ensure maximum solar energy production. The most common locations for mounting are on the roof, using solar roof mounts, or on the ground with ground-mount options.

What is the best ground mount system for solar panels?

The Unirac Ground Fixed Tilt is another great choice - it is durable and lightweight and also has a 25-year warranty. Unirac ensures fast shipping times and ease of construction. You can work with a licensed solar installer to determine which ground mount system is best for your terrain and solar panels.

What are the best solar mounting and racking brands?

The top two high-quality solar mounting and racking brands are: Originally, IronRidge supported mostly small, off-grid projects. But today, IronRidge is known for its uniquely shaped and durable XR rail series for pitched roofs. They have equally great options for flat roofs and ground mounts, as well.

Which solar racking system is right for You?

But harnessing this power requires a sturdy foundation - a reliable solar racking system. Two prominent names in this arena are IronRidge and Blue Pacific Solar, offering both pre-built and DIY options for securing your solar panels to the roof. IronRidge boasts a reputation for robust and adaptable mounting systems.
