

Photovoltaic panel mutual leasing plan

Should you buy or lease solar panels?

Homeowners who are considering solar panels have multiple buying options, including a cash purchase, solar loan or leasing solar panels. While a single cash purchase can be viable if you have the funds available, there are also ways to go solar at zero upfront cost -- like with a solar lease.

What is the difference between a solar lease and a PPA?

These two financing options are very similar. The critical difference is that with a solar lease, you'll have a fixed monthly payment, whereas with a solar PPA, you'll purchase the power generated by your system at a fixed price per kilowatt-hour (kWh). What does that mean for you?

Can you sell a solar system under a lease?

Under a solar lease, you won't own your solar system, but will still benefit from its generated electricity. A leased solar system can make selling your home more difficult because the next owner may not want to take over your lease payments. What is a solar lease?

What are the pros and cons of solar leasing?

As with any solar financing option, solar leasing comes with its share of pros and cons: The three main advantages of a solar lease are: Saving money on electricity: With a solar lease, you'll save on electricity costs throughout your agreement.

Can a homebuyer transfer a solar panel lease?

Transfer the lease: If you're moving but don't want to move your panels or purchase the system outright, you can try to transfer the lease to whomever buys your home. However, the homebuyer would have to assume the terms of the lease.

How do Solar Lease companies make money?

All the solar lease providers listed make their money by financing a solar system for your home and then selling you the solar electricity from the panels. In most cases, the companies promise you will save money on your power bills in the first year - a win-win situation.
