Who makes high-performance solar photovoltaic modules?

NINGBO, China, Nov. 10, 2021 /PRNewswire/-- Risen Energy Co., Ltd, a leading, Tier 1 manufacturer of high-performance solar photovoltaic products, today announced the release of its superior PV module with high strength alloy steel frame.

Who makes origami solar panels?

Origami's best-in-class network of roll-forming steel fabricators produce Origami Solar frames at 10x the speed of extruded aluminum and are distributed across the US within one day of most module manufacturers.

Should solar developers switch from aluminum to steel frames?

For an industry committed to delivering clean energy, the switch from aluminum to steel frames delivers a dramatic decarbonization benefit and is the obvious procurement choice for solar developers and investors.

Why is a solar module frame important?

To achieve this at scale, the solar industry faces three critical issues: The module frame is the second most costly component and a critical element of a solar module. It protects the essential energy producing components (cells) of the PV module and securely connects to essential steel support structures.

What is ZM Ecoprotect® solar?

With ZM Ecoprotect® Solar, we are clearly offering extra sustainability. It conserves resources through reduced use of zinc, it is 100 percent recyclable, and the entire portfolio is also available as blue mint® Steel - our high-quality flat steel with reduced CO₂ intensity and the same excellent material and processing properties.

Are origami solar steel frames corrosion resistant?

Origami Solar steel frames comply with the robust IEC 61707, Method 6 Salt Spray corrosion test, showing passing results synonymous with challenging (C5) coastal environments.
