Photovoltaic panels installed on the door

Where can a ground-mounted solar panel be installed?

Ground-mounted solar panels can be installed anywherewith good sun exposure and sufficient amounts of open space - a minimum of 350 square feet is usually required. Ground-mounted solar panels are also known as backyard solar panels, free-standing solar panels, and ground-mount PV systems.

Should you install solar panels on your home?

Installing solar panels on your home can significantly lower your electricity bills over time and help you live more sustainably. It's one of the best decisions homeowners can make both for the environment and their property value. Professional solar installation companies typically install solar panels.

Are ground-mounted solar panels right for You?

Ground-mounted solar panels get installed by pole mount or standard mount. Ground-mount solar panels provide homeowners a way to add solar if their home doesn't have ideal conditions for rooftop solar panels. Find out why people choose ground-mounted solar panels and if they're right for you.

Should I install solar panels on my roof?

Solar installation is complex, and you don't want to jeopardize such a costly investment. Take the time to properly think through and set up your project before beginning. First, check that your property is suitable for a solar power system. Your roof needs to have enough surface area for the panels required to supply your energy needs.

Do you need a bulky rooftop solar installation?

Luckily, you don't have to choose between a bulky rooftop solar installation or nothing at all. Homeowners have several options to make use of the sun's energy, from backyard solar panels to solar pergolas and beyond. Many of the best unique solar panel placement ideas integrate seamlessly into a home's exterior. Ready to dive in?

Are ground-mounted solar panels a good alternative to rooftop solar?

Ground-mounted solar panels are a great alternative for customers who want solar - but don't have a roof that's suitable for them. On top of being an alternative to rooftop solar, ground-mounted solar systems can be used on farms, in your garden, and more!
