What is an ABB inverter station?

The new ABB inverter station is a compact and robust solution that houses all the equipment that is needed to rapidly connect two central inverters to a medium-voltage (MV) transformer. Each station can house two 875kW or 1000kW ABB central inverters, PVS800, an embedded auxiliary power system and monitoring system.

Who needs a photovoltaic inverter?

new levels. at system who require inverters for large photovoltaic power plants and industrial and commercial buildings. The inverters are available from 100 kW up to 500 kW, and are optimized for cost-efficient multi-megawatt power plants.

What are ABB central inverters?

fed into the power network. ABB central inverters are ideal for large photovoltaic power plants and medium sized power plants installed in commercial or industrial buildings. High efficiency, proven components, compact and modular design and a host of life cycle services ensures ABB central inverters provide a rapid return on investment.

How many ABB central inverters can be installed in a station?

Each station can house two 875kW or 1000kW ABB central inverters, PVS800, an embedded auxiliary power system and monitoring system. The PVS800 central inverters used in the station have high total efficiency, with one of the most compact and easy-to-maintain designs on the market.

What is a pvs800 central inverter?

The PVS800 central inverters used in the station have high total efficiency, with one of the most compact and easy-to-maintain designs on the market. With flexible and integrated dc and ac connection cabinets, the inverter station can be rapidly and easily connected to the solar array and MV transformer.

Which inverter is best for a medium voltage power station?

The Sunny Central UP is our most powerful inverter with up to 4600 kVA and is the heart of the Medium Voltage Power Station. At a voltage of 1500 V DC it allows for significantly higher efficiency in system design. With a variety of options and the new DC-coupling readiness it provides maximum flexibility at minimum size.
