

Private solar power installation

Does Home Depot install solar panels?

Every year, The Home Depot helps thousands of homeowners install solar power systems that will reduce the cost of their monthly electricity bills. Transitioning to solar power requires custom designers and experienced contractors who can work with you on the installation of your solar panels from start to finish.

Where should a solar power system be installed?

Regardless of the type of solar panel used, the most ideal setup for a solar power system is installing solar panels on a roof-- in a region with long peak sunlight hours -- with the panels facing south (for homes in the Northern Hemisphere). Investing in a solar power system is easier today than ever before.

What is a residential solar power system?

A residential solar power system consists of photovoltaic panels and other equipment that collect sunlight to produce energy for your home. How many solar panels do I need? The number of solar panels you'll need to meet the energy demands of your home depends on your home's location and roof size.

Should you choose solar energy for your home?

Before starting the process of powering your home with solar energy, homeowners should investigate their energy use and consider potential efficiency upgrades. Homeowners should be well aware of their total electricity usage, and consider low-cost and easy-to-implement efficiency measures before choosing solar.

Should I add a solar energy system to my roof?

You may be considering the option of adding a solar energy system to your home's roof or finding another way to harness the sun's energy. While there's no one-size-fits-all solar solution, here are some resources that can help you figure out what's best for you. Consider these questions before you go solar. See the Spanish version [here](#).

How do I choose a solar installer?

Choose a solar installer. An installer can help you determine whether your roof is suitable for solar panels. Begin by researching qualified, insured installers online or asking for recommendations from people who've gone solar. Comparison-shop by asking multiple installers to come assess your roof.
