

# Renting the house to others to install photovoltaic panels

Should you add solar panels to a rental property?

Adding solar panels to a rental property can increase its desirability to prospective renters, which may lead to higher rental value. Tenants are attracted to the lower utility costs associated with solar energy, as well as the environmental benefits of using renewable energy.

Are solar panels a good option for renters?

The simple answer for renters who want solar panels for their apartment or house is that it's possible!

Can a homeowner lease or rent a solar power system?

No, only the homeowner can enter an agreement to lease or rent a solar power system. Furthermore, solar leases and rentals are designed to be long-term arrangements, so there's a big financial penalty for removing the solar panels before the contract term is up. 1. Ask your landlord to install solar panels

What are the benefits of solar panels on a rental property?

Another benefit of solar panels on a rental property is the increase in property value. Advanced technology such as solar panels can attract more interest, especially from environmentally-conscious renters.

Should you buy or lease a solar panel?

Choosing the right solar panel financing option will make going solar more affordable and extend your long-term benefits. A solar lease can help you avoid hefty upfront installation costs and enable you to benefit from energy savings sooner. However, it can also negatively impact solar incentive savings and home value.

Should you go solar if you live in an apartment complex?

For those who own their own homes, the process of going solar is easy: they can install a solar panel system on their roof, and enjoy a great return on investment while producing clean energy. Unfortunately, going solar is a lot less straightforward for those of us who live in an apartment complex or a rental home.
