

Residential solar power generation application process

How do I get solar power?

Here are the steps to take to get powered by sunshine. Choose a solar installer. An installer can help you determine whether your roof is suitable for solar panels. Begin by researching qualified, insured installers online or asking for recommendations from people who've gone solar.

When will SCE provide authorization to operate my solar system?

SCE will provide authorization to operate the solar system once proper installation and permitting are completed. Once your solar system is installed and you have been given the authorization to operate your solar system, you will be interconnected with our electric grid.

What is a solar billing plan?

When you need more energy than your system can generate, like at night or on cloudy days, you will use energy from SCE's grid. The difference between the energy you consume from the grid and the energy your system delivers back is then used to calculate your monthly bill. This is known as the Solar Billing Plan.

How do I choose a solar contractor?

Take a free Home Energy Checkup. PG&E can recommend resources and questions to ask when choosing a contractor. Find a contractor. Understand the financial considerations and benefits of investing in renewable energy. Explore leasing versus purchasing options and estimate the size of the system using our solar calculator.

How do I choose a solar installer?

Choose a solar installer. An installer can help you determine whether your roof is suitable for solar panels. Begin by researching qualified, insured installers online or asking for recommendations from people who've gone solar. Comparison-shop by asking multiple installers to come assess your roof.

How do I choose the best way to use solar electricity?

Before deciding on the best way to use solar electricity at home, assess the potential solar energy that can be produced at your address. Because PV technologies use both direct and scattered sunlight to create electricity, the solar resource across the United States is ample for home solar electric systems.
