A good price per watt for rooftop solar provides a balance of savings potential and robust warranty and service coverage. Based on recent solar pricing trends from the SEIA, this balance can be found in the \$3-4 per watt range for residential solar projects.

Should you install a solar energy system on your roof?

When you install a solar energy system, you're getting more than just solar panels on your roof. Multiple pieces of equipment, such as racking, wiring, and inverters, must be installed so the solar panels can power your home. There are also a number of costs that ensure your system is installed correctly and that the solar company can operate.

Is rooftop solar a good investment?

At its core, rooftop solar is a way to pre-purchase 25 years of electricity in order to hedge against ever-rising utility rates - quite similar to buying bulk coffee grounds instead of individual Venti Lattes from Starbucks. The return on this long-term investment depends on a handful of key factors, including the price of the solar system itself.

Do solar panels need to be installed on a 15 year old roof?

Roof replacement costs: Solar panels should be installed on roofs that are no more than 15 years old. This won't be an issue for every homeowner, but if you really want solar and your roof is getting old, roof replacement costs are something to consider.
