

# Self-built solar power house drawings

Where can I find a solar home plan?

At House Plans and More, you can find many solar home plans among the many architectural styles and sizes available.

What are passive solar house plans?

Passive solar house plans are designed to maximize the use of natural sunlight for heating and lighting purposes. These house plans use large windows and skylights to allow for plenty of natural light to enter the home, while also incorporating materials that can absorb and retain heat, such as concrete or tile flooring.

Who makes passive solar homes?

Debra has over 25 years designing low-energy, high-performance, passive solar homes. Whether you choose to select, adapt, or create a personalized, sun-inspired home with Debra, we thank you for taking the time to visit our website! Sun Plans, Inc. provides passive solar house plans and consulting service.

How many solar home plans are there?

These 91 award winning plans were selected from more than 500 entries by builders, designers, and architects. This was a very active time in passive solar home design, and the plans show a high level of innovation. This is the first 30 -- rest to come as time allows.

What are some good solar house plans?

The Eco Box Green Home and York Traditional Home are examples of solar house plans that combine both active and passive technologies. The Eco Box Green Home has 2 bedrooms and 2 full baths, while the York Traditional Home has 3 bedrooms, 2 full baths, and 1 half bath. For example, adobe style house plans are passive since they use mud bricks that absorb the sun's heat during the day to help heat the home at night.

What is a passive solar floor plan?

These homes are designed to conserve energy and promote efficient living. Passive solar floor plans are designed with large windows for optimal positioning relative to the sun. This increases the home's energy efficiency and reduces the usage of natural resources such as fossil heating fuel.
