

Selling and installing photovoltaic panels

Can you sell a home with solar panels?

In all likelihood, no. For most people, rooftop solar increases the value of their home, making it even more desirable when it eventually hits the market. And despite common fears about the process, selling a home with solar panels is usually pretty easy -- as long as your realtor is up to speed on how it works.

Should you install solar panels on your roof?

Installing solar panels on your roof can both save you energy costs and reduce your home's environmental impact. Even though there are some DIY solar panel options, installing them is a highly complex project, and you'll still need assistance from an experienced professional.

How do you sell a roof if you have solar panels?

Check for roofs that face south with little to no shade. These are prime spots for solar panels. Make sure the roof is big and strong enough to hold the panel systems. If you find roofs like this, you've got a great chance to sell. Use data to show the benefits of switching to solar power. Always focus on these top roofs first in your

Do solar panels affect the sale process?

If you paid cash and own the panels, solar will have very little impact on the sale process for your home. Again, it's not unlike selling a home with a pool or any other add-on. If you financed your solar panels with a traditional loan, there are some extra steps in the process.

Does Home Depot install solar panels?

Every year, The Home Depot helps thousands of homeowners install solar power systems that will reduce the cost of their monthly electricity bills. Transitioning to solar power requires custom designers and experienced contractors who can work with you on the installation of your solar panels from start to finish.

How do I prepare for a solar panel installation?
