

Selling solar panels for houses

Can you sell a house with solar panels?

To understand that process, we must first look at four types of solar panel ownership types and how they might affect the process you go through to sell a house. When selling a house with wholly-owned solar panels, a homeowner can sell the house with existing solar panels without transferring or removing them from service.

Can solar panels be transferred during a home sale?

Solar panels, while reducing energy costs and environmental impact, often introduce a new layer of considerations when ownership is transferred during a home sale. Let's go over the important aspects to keep in mind when transferring ownership of solar panels when buying or selling a home.

Do solar panels affect the sale of a home?

The type of solar purchase you made has a big impact on what happens when you go to sell your home. This is the simplest scenario. If you paid cash and own the panels, solar will have very little impact on the sale process for your home. Again, it's not unlike selling a home with a pool or any other add-on.

Can I buy out a solar panel lease before selling my home?

If you have a solar panel lease, you can either buy out the lease before selling your home or transfer the lease to the new homeowner. Discuss the options with your leasing company and real estate agent to determine the best approach for your situation. How can I address buyers' concerns about maintenance and warranties on the solar panels?

Can I sell my home if I financed a solar PV system?

If you financed your solar PV system with an unsecured loan (one that is not tied to your property), you can sell your home before paying off your loan -- but you will still be responsible for paying off the loan.

Should you buy a home with solar?

One of the main selling points of a home with solar is that if you get a system that's up to par, it should cut your energy costs. It might not sound like much, but this can make a big difference in many areas where electricity prices are high.

Make sure your online ads target the right audience--homeowners interested in renewable energy sources. With 22 million homes installing solar panels last year alone, there's a large market waiting for ...
