

How many energy storage stations are there in Shanxi?

As of July this year, Shanxi had put 16 energy storage stations into operation, with a total regulation capacity exceeding 1.27 million kilowatts, making the province's power supply more stable and reliable. In Shanxi, the concept of energy conservation and emission reduction has been widely embraced by the people.

Why is Shanxi Launching a new energy power station?

Jinneng's increasing number of new-energy power stations is a reflection of the energy revolution campaign in Shanxi. As one of the major coal-producing provinces in China, Shanxi is applying an industrial transformation plan to reduce its reliance on coal and increase the ratio of clean resources.

Why is Shanxi a major energy hub in North China?

Shanxi, a major energy hub in North China, has been promoting the optimal combination of traditional energy and new energy in recent years, and has achieved new results in green and low-carbon development. The coal-rich province has continued to improve the quality of the energy supply.

Is Shanxi a good place to invest in green energy?

In Shanxi, the proportion of installed capacity from new and clean energy rose from 33.9 percent in 2019 to 47.2 percent in the first half of 2024, while the share of electricity generated from these sources increased from 18.1 percent to 28.2 percent during the same period. Shanxi has a unique advantage in developing green energy sources.

How has Shanxi accelerated the development of coal mines?

The proportion of advanced coal production capacity has exceeded 75 percent, among the highest in the country. Shanxi has accelerated the intelligent development of coal mines by introducing artificial intelligence, 5G communications, and big data technologies.

Does Jinneng Holding have a coal-fired power plant in Shanxi?

The firm marks Jinneng Holding's recent effort to shift its focus from coal-fired power plants to energy developments with lower carbon-dioxide emissions. In 2020, the company launched one gas-fired, seven wind-power and four solar-power plants in Shanxi. The total generation capacity reaches 546,000 kilowatts, according to company executives.
